

### About the Taisho Pond

Taisho Pond is about 500 meters in length from east to west and 150 meters from north to south, with a water surface area of about 47,500m<sup>2</sup>.

The water depth is about eight meters at its deepest point, so the water storage capacity is about 140,000m<sup>3</sup>. This is enough water to supply residents of Iwamizawa for about five days.

With such a year-round abundance of water, this resource and its natural environment provide us with recreation and peace of mind. They play a role in maintaining a habitat for a wide variety of plants and animals, including wild birds.

All visitors are kindly asked to follow the rules to maintain a good waterfront environment forever.
